#### **Course Description**

Life Science is a basic introductory course for those students that either want to fulfill the San Dieguito Union High School District's requirement for one year full of life science or those students that are thinking about enrolling in the course of biology in the future and want to review the life science principles. It utilizes lectures, demonstrations, textbooks, laboratory exercises and other visual aids to give the students a basic background in the field of life science. The course is specifically set up for providing the student with information and experiences that can be taken into their daily lives.

#### **Additional Information for Students/Parents**

Not recommended for students who have completed Biology with grade C or better.
